

ALEX AUMAIS

aaumais@uwaterloo.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Waterloo

2023 - Present

Bachelor of Software Engineering

Waterloo, Canada

- **Average: 98%**. Relevant courses: Database Systems, Compilers, OOP, Data Structures and Algorithms, Statistics
- VP Events - Software Engineering Society, Software and Media Lead - Waterloo Rocketry Team, Residence Life Don, Water Polo

EXPERIENCE

Bloomberg

New York City, USA

Software Engineer

Sept 2025 – Dec 2025

- Designed a **high-volume** parquet-based pricing **data ingestion** system driving Liquidity Analytics in Enterprise Data

Voiceflow

Toronto, Canada

Runtime Software Engineer

Jan 2025 – Apr 2025

- Shipped real-time **AI voice** and **audio pipeline** features like **answering machine detection**, noise suppression, and fast ASR
- Reduced **latency by 600ms** in TTS streaming via **buffering** optimizations, improving conversationality. See my [blog post](#)
- Improved test coverage and **reliability**, led **95** diligent code reviews, and rapidly resolved **3 critical production incidents**
- Resolved **130** high-complexity **runtime tickets** across distributed microservices (**HTTP**, **websockets**, **message queues**)

Developer Advocate and Content Creator for Growth

Mar 2024 – Aug 2024

- Initiated and **led our 2.0 documentation** revamp, improving organization, and writing new articles, which **tripled docs traffic**
- Built **5 GenAI apps** using **Python**, **TypeScript**, **C#**, and **React**, and 17 demos with 100k+ views to boost developer adoption

Hack the North

Waterloo, Canada

Backend Engineering Lead

Nov 2024 – Present

- Led **5 engineers** in developing products like event gamification and scheduling tools for **Canada's largest hackathon**
- Launched **Capture the Flag**, designing hacker challenges, and developing algorithmic **anti-cheat** for over **1,338 player**
- **Mentored team** via pair programming, code reviews, and unblocking to help them thrive and ship faster
- Created **detailed SQL data reports** and dashboards in Metabase to support logistics with accurate data-driven decisions

Backend Software Engineer

Mar 2024 – Nov 2024

- Developed new **GraphQL** CRUD endpoints in a TypeScript Apollo stack to expand core features like **auth**, kudos and buses
- Built and deployed Goose Guide Bot, a **GenAI Slack bot** used by 1,000+ participants that auto-answered 91% of questions
- Performed platform **on-call maintenance** on GCP, resolving prod issues through log analysis, debugging, and patching

Celeste Community

Online

Broadcast Infrastructure Developer and Event Producer

Jan 2021 – Sept 2023

- Refactored **Python** broadcasting infra into an **object-oriented**, **crash-resistant** architecture, reducing interruptions by **80%**
- Producer and event organizer, raising over **\$40,000** for trans rights charities by putting on **marathon livestream events**

PROJECTS

ChatGPT Gender Perception Study and Paper | *Python, Pandas, NumPy, Matplotlib*

[Portfolio](#)

- Led research on ChatGPT gender bias, analyzing **588 responses** with custom **Pandas/NumPy** tools and publishing findings

Snowfake (winner of Trophées de la NSI) | *Python, pygame, Git*

[GitHub](#)

- Co-developed a **Python snowflake simulator** to teach science, winning **1st place** in France's Trophées de la NSI with our pitch

SKILLS

Languages: Python, TypeScript, C, C++, Scala, Java, JavaScript, C#, Solidity (Ethereum)

Technologies & Frameworks: GraphQL, WebSocket and SSE, RabbitMQ Queues, Prisma, SQL, Flask, Matplotlib, NumPy, Pandas

Platforms & Tools: Google Cloud Platform, Kubernetes, Docker, Git, Jupyter, Metabase, Figma, Postman, DataDog
