

ALEX AUMAIS

aaumais@uwaterloo.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Waterloo

2023 - 2028

Bachelor of Software Engineering

Waterloo, Canada

- **Average: 98%**. Relevant courses: Database Systems, Operating Systems, Compilers, Data Structures and Algorithms, Statistics
- VP Events - Software Engineering Society, Software and Media Lead - Waterloo Rocketry Team, Residence Life Don, Water Polo

EXPERIENCE

Databricks

San Francisco, USA

Software Engineer Intern

May 2026 – Present

- Designed **idempotent Temporal workflows** with retry, heartbeat, rollback, and failure recovery for resilient data operations
- Drove a **70x speedup** in a copy pipeline by identifying inefficiency, working cross-team, and leading production rollout planning

Bloomberg

New York City, USA

Software Engineer Intern

Sept 2025 – Dec 2025

- Designed a **high-volume Parquet ingestion pipeline** powering pricing data for [Liquidity Analytics](#) in Enterprise Data
- Only intern to ship to **production**, validating outputs with Jupyter-based diffing, mock testing, and production parity analysis

Voiceflow

Toronto, Canada

Runtime Software Engineer Intern

Jan 2025 – Apr 2025

- Shipped real-time **AI voice** and **audio pipeline** features like **answering machine detection**, noise suppression, and fast ASR
- Reduced **latency by 600ms** in TTS streaming via **buffering** optimizations, improving conversationality. Read my [blog post](#)
- Resolved **3 Sev0 incidents** and **130** runtime engine tickets across microservices using **websockets** and **message queues**

Developer Advocate and Content Creator for Growth

Mar 2024 – Aug 2024

- Initiated and **led our 2.0 documentation** revamp, improving organization, and writing new articles, which **tripled docs traffic**
- Built **5 GenAI apps** using **Python, TypeScript, C#, and React**, and 17 demos with 100k+ views to boost developer adoption

Hack the North

Waterloo, Canada

Product Manager

Nov 2025 – Present

- **Managed a 13 person engineering organization**, unifying frontend and backend teams for **Canada's largest hackathon**
- Authored **Product Requirement Documents** and oversaw development to ship **14+ products** with top quality and on time
- Currently executing the **largest scale hardware project** ever done by a North American hackathon – under NDA for now!

Backend Engineering Lead

Nov 2024 – Nov 2025

- **Led 5 engineers** through developing 8 products, like event gamification and scheduling tools, mentoring to help them thrive
- Launched **Capture the Flag**, designing hacker challenges, and developing algorithmic **anti-cheat** for over **1,337 player**
- Performed platform **on-call maintenance** on GCP, resolving prod issues through log analysis, debugging, and patching

Backend Software Engineer

Mar 2024 – Nov 2024

- Developed new **GraphQL** CRUD endpoints in a TypeScript Apollo stack to expand core features like **auth**, kudos and buses
- Built and deployed [Goose Guide Bot](#), a **GenAI Slack bot** used by 1,000+ participants that auto-answered 91% of questions

PROJECTS

Cookd.ca | TypeScript, NestJS, NextJS

[Website](#)

- **Co-founded** and scaled Cookd.ca, Beli but for your own cooking, to **hundreds of recipes**, quickly shipping requested features

Additional Portfolio Projects | Full-stack, AI, data, graphics, research, media

[Portfolio](#)

- Built **40+** fun projects including [Snap and Seek](#), [Been There](#), [Shower Scribe](#), [Project Carlito](#), a [snowflake simulator](#), and more!

SKILLS

Languages & Frameworks: Python, TypeScript, NextJS, C, C++, Scala, Java, JavaScript, C#, Solidity (Ethereum), SQL, GraphQL

Technologies & Platforms: Temporal, WebSocket, Google Cloud Platform, AWS, Kubernetes, Docker, Message Queues, Prisma, Pandas
